

# Can energy savings help a **troubled economy?**

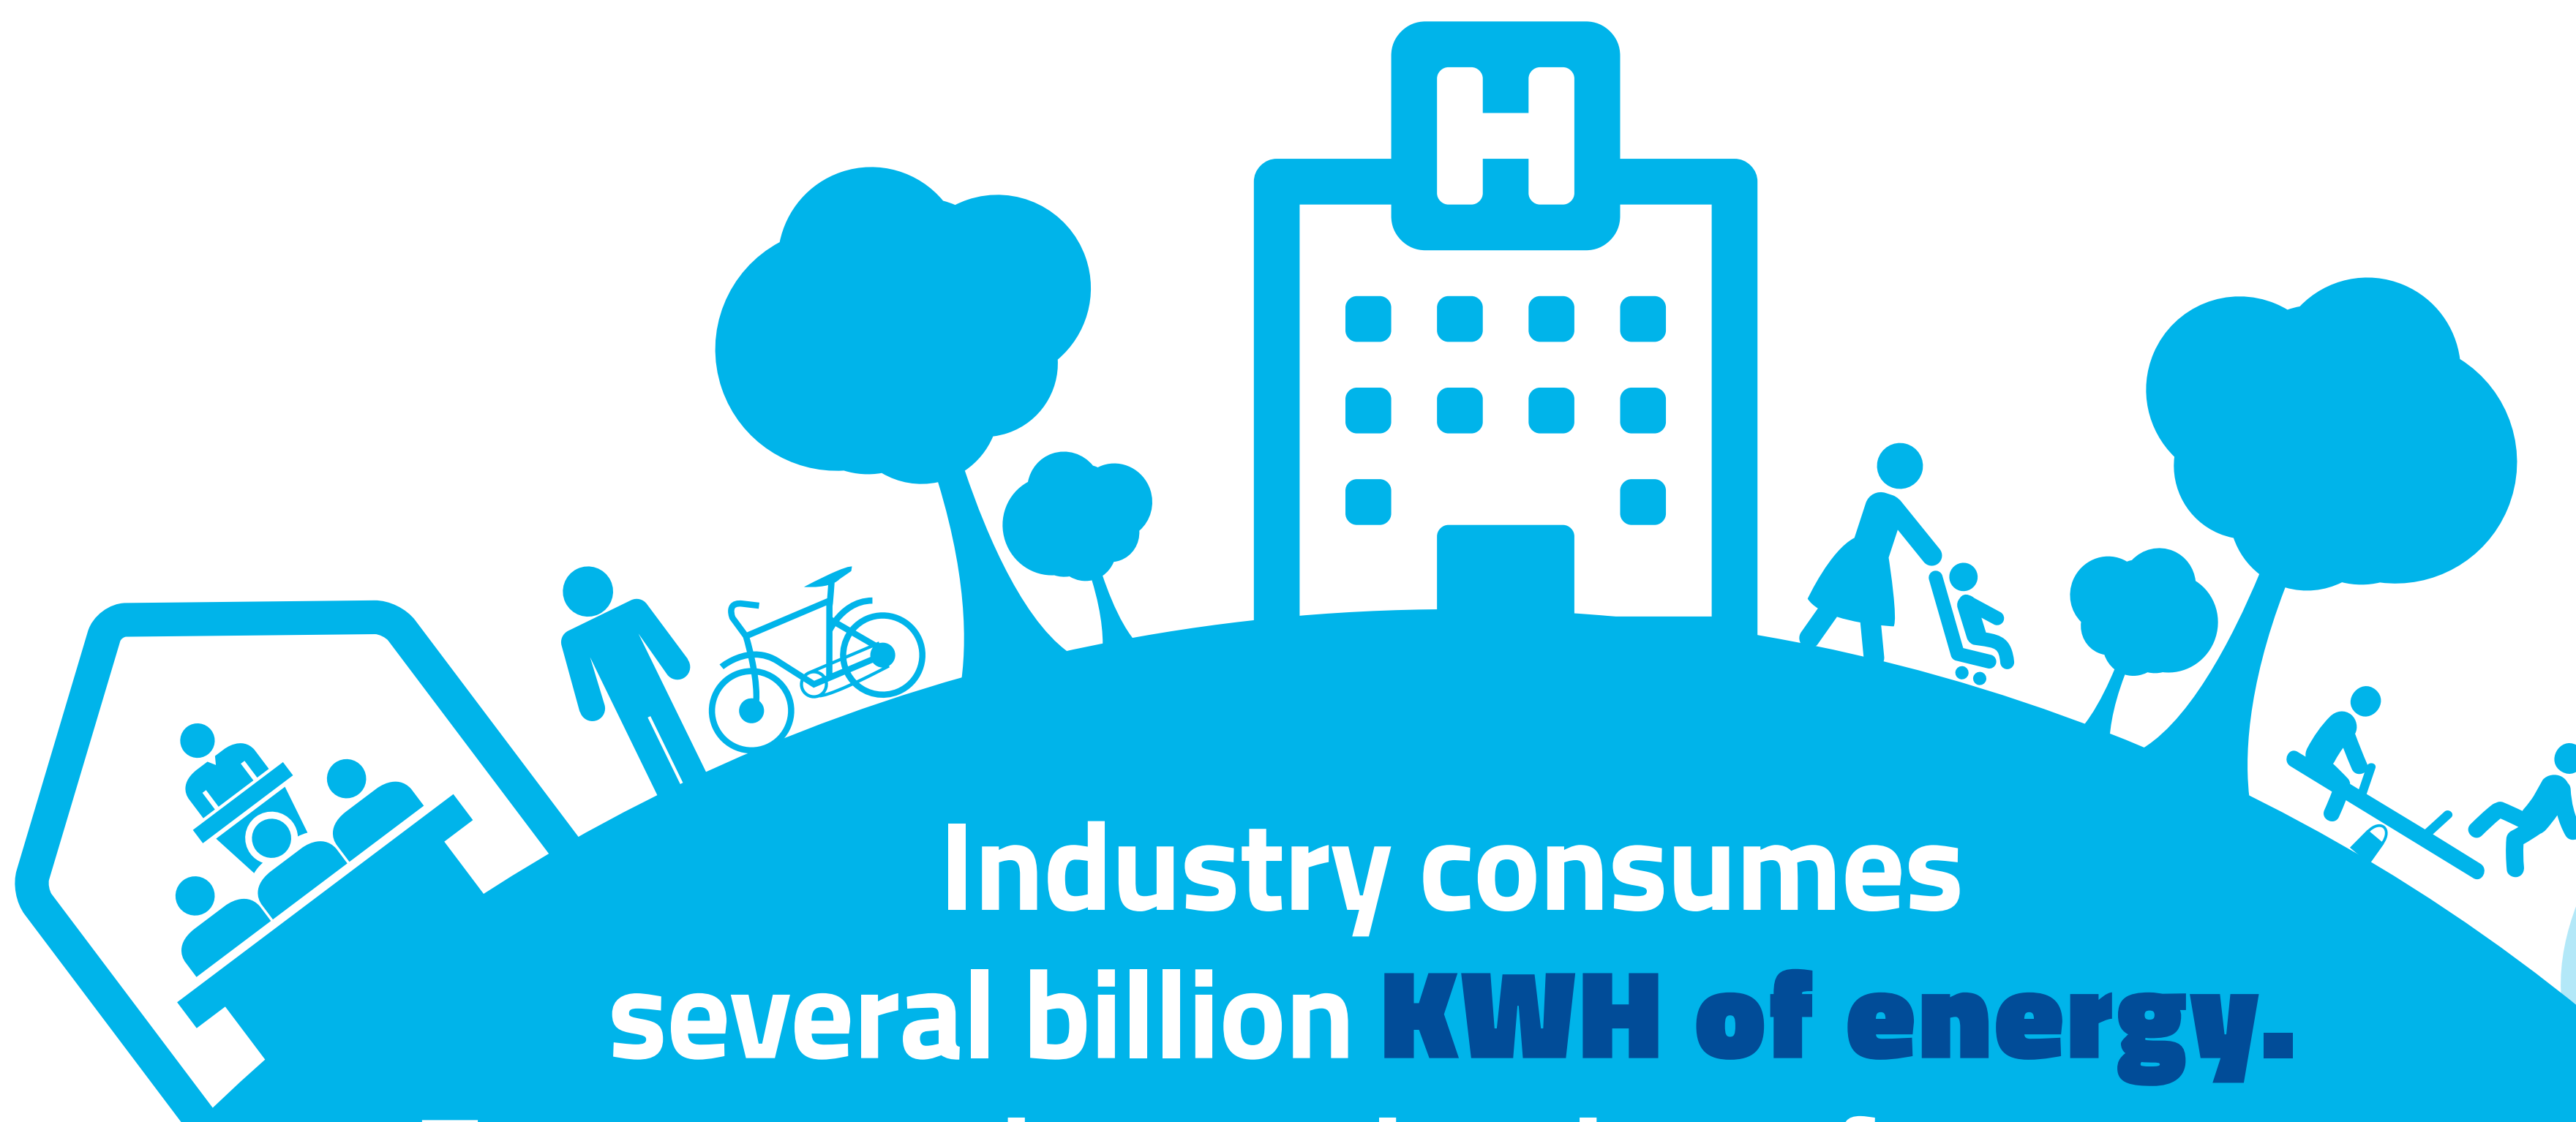

**Egypt** spends  
on energy subsidies

**4** times  
what spends on health care,

and **2** times  
what spends on education,

and **100** times  
what spends on environmental protection

Industry consumes  
several billion **KWH of energy.**

Even a modest reduction of energy use  
would result in **several million EGP** saved by  
the government each month that could be used for  
hospitals, schools and social spending!
