

# Energy savings do not always require big investments!

Most Energy Management System (EnMS)  
adopters achieve savings varying from

**5%** to **20%**

in their energy consumptions  
with minimal investments

By implementing  
Energy Management System a  
steel manufacturer in **South Africa**, has  
saved roughly **EUR 6 million** against minimal  
capital investment of **EUR 36,000**
